Crew Guide

Every boat is different. And the crew works within these differences every day. Playsheets help us discover the best choreography for getting our jobs done, and give us a place to document it “for the next guy” After all, nobody wants to be mid-bow their entire sailing career.

Playsheets

By selecting the CREW tile and then the PLAYSHEETS tab, you can be in a position to edit the playsheets for your role. Just select the role you want to change and start typing. There’s one playsheet for each type of maneuver; tacks, jibes, roundings etc. Look at the “performance variables” graphic below the text to understand the optimal timing for each activity.

When you’re finished, you can create a PDF so you have something to reference when you’re bored.

If you’re new to the role on this boat, then review the existing playsheet to see what the expectations for the timing of your motions will be.
